DETAILED ACTION

Claims 1-33 are pending.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 13-17, 22-25, 32-33, drawn to an isolated peptide of SEQ ID NO: 2, a fusion protein, a composition, a kit comprising the peptide, and a method of making the same.

Group II, claim(s) 5-6, 8-12, drawn to a purified nucleic acid molecule comprising a DNA sequence of SEQ ID NO: 2 and a method of using the nucleic acid molecule.

Group III, claim(s) 7, drawn to a nucleic acid molecule comprising SEQ ID NO: 3.

Group IV, claim(s) 18-21 drawn to a method for determining the HEV antibodies.

Group V, claim(s) 26-31, drawn to a method and a kit of detecting the presence of an HEV antigen.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical feature of the current invention is directed to a peptide comprising the amino acid sequence of SEQ ID NO: 2 or a homology thereof as well as method of making the same. However, this technical feature is already disclosed by the prior art as evidenced by Reyes et al. (US Patent No. 5,686,239A). In this patent, Reyes et al discloses a Hepatitis E antigen peptide and a method of making a peptide comprising a sequence having 100% identical to the claimed SEQ ID NO: 2. Therefore, the claims lack unity that links all claims under the same unique technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1648

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bao Qun Li whose telephone number is 571-272-0904. The examiner can normally be reached on 7:00 am to 3:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Housel can be reached on 571-272-0902. The fax phone numbers for the organization where this application or proceeding is assigned are 571-272-1600 for regular communications and 703-308-4242 for After Final communications.

2. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
